DETAILED ACTION

1. The Appeal Brief filed by Applicant on 11/08/05 has been entered.

Response to Amendment/Arguments

2. Applicant's amendment and arguments filed on 11/08/05 have been fully considered and they are found persuasive.

3. The rejection of claims 1-36 under 35 U.S.C. 103(a) as being unpatentable over Watanabe et al., EP 1 125 928 A1 (hereinafter "Watanabe") is withdrawn.

Allowable Subject Matter/Reasons for Allowance

4. Claims 1-36 are allowed.

5. The following is an examiner's statement of reasons for allowance: The closest prior art located or identified by the Examiner is Watanabe. Watanabe teaches a transition metal compound and catalyst for the production of polyolefins. See Watanabe, Abstract; pages 3-6. Furthermore, Watanabe expressly states R^{6-15} of formula I may be bonded to each other to form a ring. See Watanabe, page 4, lines 23-24. The Examiner has

decided to withdraw the obviousness rejection for the following reasons"

- a. The symmetry requirement of the present invention would require not only ring connectivity, but also identical location on the two rings resulting in the required symmetry;
- b. The connectivity may be saturated, unsaturated or hetero result in an enormous number of choices;
- c. The rings formed may not be adjacent;
- d. Taken in consideration the number of choices, based on the type of rings and location of rings one of ordinary skill would have to unfairly "pick and choose."

6. As of the date of this Notice of Allowability, the Examiner has not located or identified any reference that can be used singularly or in combination with another reference including Watanabe to render the present invention anticipated or obvious to one of ordinary skill in the art.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
